To whom it may concern,

For the Summer 2021, I had the pleasure of being the supervisor Tech Lead of Anthony Ngo. During that time, he worked with the Blue BerryNinjas scrum team on enhancing the Medicare Enrollment and Billing platform.

Anthony worked with Oracle PL/SQL, SSIS and java during his brief tenure with the team. In fact, Anthony wrote the SSIS package our team will be using for generating conversion files for a NACHA compliance project. Anthony exhibited an impressive combination of speed and accuracy that enabled him to produce a very high volume of work while maintaining excellent standards for quality. Anthony was a pleasure to have on the team and his work was exceptional.

Please feel free to contact me if you need additional information or perspective.

Sincerely,

Elizabeth Czarnecki
